

PROFILE

- **Full-Stack Developer** with experience building web applications and a strong focus on modern frontend development, including React, JavaScript, TypeScript, and responsive UI development.
- Experienced in translating business requirements into maintainable interfaces and collaborating across technical and non-technical teams throughout the development lifecycle.
- Currently pursuing a Web Development Diploma at Cornerstone International Community College in Vancouver, with a focus on strengthening full-stack development and modern software engineering practices.

CORE SKILLS

Languages: TypeScript, JavaScript (ES6+), C++

Front-end Technologies: React, Next.js, Astro, HTML5, CSS3, SASS, Tailwind CSS, Responsive Design, Accessibility

Back-End & APIs: Node.js, Express.js, RESTful APIs, API Integration

Databases & Data: PostgreSQL, Neon, Prisma, MongoDB, Mongoose

Development Tools: Git, GitHub, Docker, npm, Postman, Jira, Netlify, Vercel, Figma

Development Practices: Agile Development, Technical Leadership, Requirements Analysis, Code Quality, Testing

WORK EXPERIENCE

FRONT-END DEVELOPER & PROJECT LEAD | Meliora AI (Mexico City, Mexico, Remote) *Feb 2025 – June 2025*
Early-stage AI startup focused on operational coordination, internal process organization, and cross-team project support.

- Developed the frontend of a full-featured accounting web application using **React** and **Tailwind CSS**, integrating with **Express.js** REST APIs and implementing responsive UI components and complex validation logic.
- Designed intuitive, user-centered interfaces optimized for both desktop and mobile devices.
- Led end-to-end development using the **Scrum framework**, managing task allocation and sprint tracking on **Jira and GitHub** to maintain a **100% on-time delivery rate**.
- Served as the primary point of contact between clients and the development team, translating technical requirements into actionable development tasks and communicating project progress.

AI MODEL TRAINER & CODE EVALUATOR | Outlier AI (Mexico City, Mexico, Remote) *Dec 2024 – Feb 2025*
AI data services company specializing in data labeling, validation, and quality assurance for machine learning models.

- Evaluated code generation, logical reasoning, and complex algorithms produced by **Large Language Models (LLMs)**, identifying syntax errors, logic bugs, and edge cases.
- **Conducted technical quality assurance (QA)** and error-pattern analysis, documenting structural insights to improve model accuracy, output coherence, and response precision.
- Executed rigorous prompt engineering and test scenarios, delivering **20+ technical evaluations weekly**.

EDUCATION

Web Development Diploma Co-op *Jan 2026 – Present*
Cornerstone International Community College | Vancouver, BC

Bachelor's Degree in Computer Science & Engineering *Aug 2020 – Jun 2025*
Instituto Tecnológico de Monterrey | México

CERTIFICATIONS

Scrum Fundamentals by *SCRUMStudy*

Awards

1st Place at ExpolIngenierías CDMX 2024
CREMA: Academic Excellence (Feb-Jun 2022, 2024)
